

Nutramigen® LIPIL® with Enflora™ LGG is a hypoallergenic, lactose-free formula for babies who develop cow's milk protein allergy. Additionally, Nutramigen LIPIL with Enflora LGG includes Lactobacillus GG which has been shown to promote immune system balance.

Experts agree on the many benefits of breast milk. If you choose to use infant formula, ask your baby's doctor about the many benefits of Nutramigen LIPIL with Enflora LGG.

INSTRUCTIONS FOR PREPARATION & USE

Your baby's health depends on carefully following the instructions below.

Proper hygiene, preparation, dilution, use and storage are important when preparing infant formula. Powdered infant formulas are not sterile and should not be fed to premature infants or infants who are immunocompromised unless directed and supervised by your baby's doctor. Ask your baby's doctor which formula is appropriate for your baby.

Ask your baby's doctor about the need to use cooled, boiled water for mixing and the need to boil clean utensils, bottles and nipples in water before use.

1. Wash hands thoroughly with soap and water before preparing formula.

2. Pour desired amount of water into the bottle. Add powder.

3. Cap bottle and SHAKE WELL.

Use the chart below for correct amounts of water and powder. Use scoop in can to measure powder. Store DRY scoop in this can.

To Make*	Water	Powder
2 fl oz bottle	2 fl oz	1 PACKED level scoop (9 g)
4 fl oz bottle	4 fl oz	2 PACKED level scoops (18 g)
8 fl oz bottle	8 fl oz	4 PACKED level scoops (36 g)

*Each scoop adds about 0.2 fl oz to the amount of prepared formula.

Warning: Do not warm. Warming may limit benefits of LGG. Microwaving formula may cause serious burns to baby.

Failure to follow these instructions could result in severe harm. Once prepared, infant formula can spoil quickly.
